DINESH KUMAR

AI/ML Engineer | Generative AI & LLM Applications | Machine Learning | AI Product Engineering

Chennai, India | +91 99521 29182 | dineshkumarsn33@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

AI/ML Engineer with 7+ years of experience building B2B SaaS products for HR-tech, recruitment, fintech and healthcare, now focused on machine learning and generative AI. Builds LLM-powered applications with Python, LangChain, RAG pipelines and vector databases, and machine learning models with scikit-learn, XGBoost and PyTorch, from data preparation and model evaluation to deployment with FastAPI, Docker and Streamlit. Worked on AI-powered products including Loyaltri (AI HRMS) and Monkify.ai (AI recruitment and job matching). A strong front-end, data visualisation and UX background helps turn models into reliable, easy-to-use product features.

TECHNICAL SKILLS

- **Programming:** Python, SQL, JavaScript, TypeScript, HTML5, CSS3, Bash
- **Machine Learning:** Supervised and unsupervised learning, regression, classification, clustering, feature engineering, model evaluation (precision, recall, F1, ROC-AUC), cross-validation, hyperparameter tuning, scikit-learn, XGBoost, SHAP
- **Deep Learning:** PyTorch, TensorFlow, Keras, neural networks, CNNs, RNNs/LSTMs, Transformers, transfer learning, fine-tuning
- **Generative AI & LLMs:** OpenAI GPT, Claude, Gemini, Llama, Hugging Face Transformers, LangChain, LlamaIndex, Retrieval-Augmented Generation (RAG), prompt engineering, embeddings, AI agents, tool calling, LoRA/PEFT fine-tuning, LLM evaluation
- **NLP:** Text classification, named entity recognition, sentiment analysis, semantic search, resume parsing, job matching, Sentence-Transformers, spaCy, NLTK
- **Computer Vision:** OpenCV, image classification, object detection (YOLO), OCR, Stable Diffusion, Hugging Face Diffusers, Adobe Firefly
- **Data & Analytics:** Pandas, NumPy, Matplotlib, Seaborn, Plotly, Power BI, Jupyter, exploratory data analysis, data cleaning, data visualisation, dashboards
- **Databases & Vector Stores:** PostgreSQL, MySQL, MongoDB, Pinecone, ChromaDB, FAISS
- **MLOps & Deployment:** FastAPI, Flask, REST APIs, Streamlit, Gradio, Docker, Git, GitHub Actions, MLflow, AWS (SageMaker, EC2, S3), Azure OpenAI, Google Cloud Vertex AI
- **AI Product & UX:** AI feature design, human-in-the-loop workflows, Figma, Figma AI, Figma Make, prototyping, design systems, WCAG 2.1 AA accessibility
- **Collaboration:** Agile/Scrum, Jira, cross-functional product and engineering teams, stakeholder presentations, mentoring

PROFESSIONAL EXPERIENCE

Senior UI/UX & Product Designer | Orange Office Technologies, Chennai **Sep 2020 – Present**

- Led product and AI feature design for 6 SaaS products across HR-tech, recruitment, fintech and healthcare, working with engineering and product teams in Agile/Scrum sprints.
- **Key projects:**
  - **Loyaltri (AI HRMS):** delivered onboarding, attendance, payroll, leave and recruitment modules and people-analytics dashboards for clients across India and the GCC.
  - **Monkify.ai (AI recruitment):** built the candidate-to-job matching flow, AI job recommendations, job filters and recruiter shortlisting dashboards for iOS and Android.
  - **Novacare (healthcare):** designed doctor discovery, appointment booking, reminders and health records, with symptom-based doctor recommendations.
  - **Veyro (fintech):** designed payments, transaction history and spend analytics, with automatic transaction categorisation and spend insights.
  - **Aura (fintech):** designed budgeting, savings goals and account management, with AI budgeting suggestions and unusual-transaction alerts.
  - **Auvia (healthcare):** designed health tracking, consultations and patient dashboards that turn health metrics into easy-to-read trends.
- Designed AI feature experiences: prompt inputs, model output display, confidence and fallback states, and human-in-the-loop review flows.
- Built AI-assisted workflows with Claude, Adobe Firefly, Figma AI and Figma Make, using prompt engineering for faster concepting and prototyping.
- Built a Figma design system with reusable components and design tokens, reducing visual inconsistencies by 35%.
- Simplified a healthcare appointment booking flow, increasing appointment completion by 25%.
- Produced 50+ product demo and explainer videos and 300+ launch assets; mentored 5 junior designers and presented to clients and leadership.

UI/UX Designer & Front-End Developer | Qmax **Mar 2019 – Sep 2020**

- Designed and built real-time analytics dashboards and data visualisations, driving a 20% increase in user engagement.
- Developed responsive front-end interfaces with HTML, CSS and JavaScript, working closely with backend developers on API integration.
- Created a reusable component and pattern library that sped up design-to-development handoff by 40%.

PROJECTS

Loyaltri – AI-Powered HRMS Platform | *SaaS HR-tech, India & GCC*

- Worked on an AI-powered HR and workforce platform covering onboarding, attendance, payroll, leave and recruitment.
- Designed AI-driven HR features and people-analytics dashboards that turn attendance and payroll data into clear insights for HR teams.

Monkify.ai – AI Recruitment & Job Matching App | *iOS, Android, AI matching*

- Worked on an AI recruitment app that matches candidates to job roles, with job filters, recruiter dashboards and application tracking.
- Designed the end-to-end flow from candidate profile creation to AI job recommendations and recruiter shortlisting.

Novacare – Healthcare App | *Healthcare, patient booking, AI-assisted care*

- Worked on a patient-facing healthcare app covering doctor discovery, appointment booking, reminders and health records.
- Designed AI-assisted features such as symptom-based doctor recommendations and smart appointment slot suggestions.

Veyro – Fintech App | *Fintech, payments, spend analytics*

- Worked on a fintech app for payments, transaction history and personal spend tracking.
- Designed AI-driven spend insights, automatic transaction categorisation and data visualisation dashboards for users.

Aura – Fintech App | *Fintech, personal finance, AI insights*

- Worked on a personal finance app for budgeting, savings goals and account management.
- Designed AI-powered budgeting suggestions, unusual-transaction alerts and clear financial reports for everyday users.

Auvia – Healthcare App | *Healthcare, health tracking, patient analytics*

- Worked on a healthcare app for health tracking, consultations and patient engagement.
- Designed health data dashboards and AI-assisted insights that turn tracked health metrics into easy-to-read trends.

EDUCATION

B.E. Civil Engineering | Government College of Engineering **2013 – 2017**

CERTIFICATIONS

- Google UX Design Professional Certificate
- Figma Advanced UI Design
- Design Patterns (UI/UX)
